TECHNICAL GLOSSARY

SCR - SINGLE CHAINRING SPECIFIC

Sometimes it's not what you can add to a design, it's how much you can take away that makes it brilliant. There's no better example of that than contemporary single ring transmissions and our SCR bikes either. By expanding the rear cassette range, all the gears you need are available from one chainring, simply, sequentially and with no inter chainring grind. Mechanically it means you immediately lose the weight of the chainring, front shifter, cables and front mech. Structurally it frees up a load of space in the most crowded part of the bike where tyre, mud, chain, front mech, suspension movement and seat tube all potentially collide.

SRAM pioneered the development of single chain ring production and thanks to our reputation for innovation and close working relationship they knew we'd 'get it' immediately, so they let us in on their revolutionary thinking way ahead of the curve. That meant we could maximise the advantage of their single minded thinking before most brands even got off the fence.

With SCR we completely redesigned the back end of our bikes to make the most of the new found space. That means symmetrical stays rather than weaker, heavier tubes offset around the chain and tyre. We could also increase the rear pivot span by 20mm giving an overall stiffness boost where it's the most obvious for power delivery and handling precision. We've also reduced overall weight, increased weather proofing, durability and provided simpler, faster sequential shifting. All combined and you can begin to see why we've applied the advantages of SCR to even more bikes in our range as well as featuring SRAM's incredible 12 speed Eagle transmission and Shimano's superb 12 speed XT, XTR and SLX in many of our premium MTB categories.

OTO – OPTIMISED TRAIL OFFSET

Whyte's latest OTO geometry system uses a new generation of reduced offset forks. It increases the Trail for improved steering stability and moves the mass of the fork and wheel closer to the steering axis for a more neutral steering feel.

An important note: The Reduced Offset Fork is only one part of the formula. Fitting a reduced offset fork (from 46mm to 37mm) to an unadjusted frame would be equivalent to reducing the wheelbase by 8.2mm (due to the 65 degree head-angle) So, the complete chassis must be designed around the OTO concept and that is what we have done with all our 2020 suspension platforms, as well as our 900, 800 and 29er Hardtail bikes.

QUAD 4 SUSPENSION

When we set out to design bikes around the 29er and 650b wheel sizes, we quickly realised we needed a suspension system that was different to anything we'd produced before. With our design and development squarely focused on the unique environment that is UK trail riding, we knew weather-proof reliability - a hereditary feature of our Quad-Link systems - was key, and there would be no compromising on frame geometry. With that in mind, we went back to the drawing board.

It didn't take long to realise that with bigger wheels and full-suspension systems, the suspension kinematics, architectural layout of the frame, and the frame's geometry needed to be designed in unison, with each small change having a knock-on effect elsewhere in the chain. Keeping the rear of the bike as compact and stiff as possible with the same dynamic ride of a 26in bike meant minimising the distance between the rear wheel and bottom bracket centres - a difficult task on a bigger wheeled bike but a cornerstone of the Whyte experience. After much head scratching and late night computer modelling, Quad 4 was born, and it changed the game, with Mountain Biking Australia proclaiming it had "pioneered a new era of progressive genre defining 29er full suspension bikes." With our latest SCR/SCS bikes taking Quad-4 to the next level, the new era is already here.

TECHNICAL GLOSSARY

BBX / DOX

Our internal cable routing is carefully sealed to stop water getting inside the frame and our unique easy access BBX and DOX features make the normal nightmare of servicing internal cable routing or adding a stealth dropper post blissfully simple.

INTERGRIP

The invention of reliable dropper seatposts has changed the way we ride - no longer do we find ourselves clumsily wrestling a quick release with frozen fingers at the top of a descent to drop our saddles out of harm's way, a simple push of a button or lever is all that's required.

With their widespread acceptance, it became clear to us that the days of the humble quick release (or even the seatpost collar) were numbered, so we have created Intergrip, our proprietary internal seat post clamping system featured on all our Suspension bikes. Not only does it look neater, but with no split in the tube to allow for clamping, tolerances can be much tighter and water kept out of the frame for longer.

GETTA GRIP

Getta Grip has been developed from scratch to improve the way a seat post is held in the frame. Traditional clamps need to distort the top of the seat tube to grip the seat post and often bind after long periods of use, as the frame can no longer "remember" its original shape. The Patented Getta Grip system takes a whole new approach using a pad that fits through a window in the frame - ideal for wet conditions as there is no open slot to let in mud and water. Because the Getta Grip seat clamp only has to hold the seat post rather than distort the frame tube, less force is required to operate it. The clamping force is spread more evenly making it ideal for carbon posts and has been officially approved by Easton for use with all their seat posts.

MOUNTAIN EBIKES BOSCH GEN4

GET READY TO CHARGE

Whyte are proud to introduce our high performance eMTBs - available from summer 2019.

Combining Whyte Geometry, handling and performance characteristics with the new powerful, compact and lightweight Gen 4 system from Bosch we have achieved what until now was impossible.

Key features:

- We have developed our award-winning OTO frame geometry specifically for eMTB
- Latest generation Whyte suspension kinematics and hardware, with Metric shock and coil-over compatibility
- We've packaged the new Bosch Gen 4 system into an Ultra-Low Centre of Gravity chassis
- Ultra-Low Polar Moments of Inertia in Pitch, Yaw and Roll, means exceptional manoeuvrability and unparalleled and un-compromised handling
- Bosch Gen 4 is the revolutionary next generation complete e-Bike system from the market leader, with full UK service backup
- A lightweight, compact motor with minimal pedal resistance sets the new standard for eMTB motors. Weighing only 2.9kg with up to 75 Nm torque it's 48% smaller than it Gen 3 predecessor
- 625Wh PowerTube battery – 3.7 hours for full charge with optional 6A Fast Charger
- Drive-Unit, Battery and Header-Units are fully integrated into the chassis design
- The battery loads through an in-line port in the end of the Down-Tube
- Future-Proof interchangeable battery capacity options for maximum range
- Maximum downtube structural integrity and torsional stiffness guaranteed with no long cut-outs in the downtube 'torsional box'
- Efficient use of materials – maximum torsional stiffness from light-weight 2.7mm thin-wall hydroformed downtube
- Battery Removal independent of the Drive Motor
- Fully managed internal RD cable, Brake hose, dropper seat post and wiring
- Whyte Patents pending
- 23.9kg e-150 RS size medium – with 625Wh battery, proper MTB spec and DoubleDown tyre spec
- Whyte are proud to launch the future of the high-performance eMTB
- Original Stag's Head Logo – accept no imitations

E-180 RS

E-MTB Gravity/Enduro Suspension - 180mm

SRP £5,750

Product Code - WE180RS(size)V1

Colour	Matt Gun Metal Black / Burnt Orange
Sizes Available	M,L
Frame	6061 Alloy, Hydro Formed T6 Aluminium, Multi Butted, Custom Drawn, Tapered Headtube, Internal BBX Cable Routing for Dropper Post and 12mm X 148mm Boost Dropouts
Fork	Fox Performance Elite 36 27.5", 180mm Travel, 44mm Offset with Grip 2 Damper and custom tune, Tapered Steerer, Black Coating, 110mm x 15mm Boost, E-Thru Axle
Rear Shock	Fox Float DHX-2, Factory, independently adjustable Compression and Rebound damping, Super-Light Steel spring
Headset	FSA No. 57E Orbit ZS, 1 1/2" Lower and 1 1/8" Upper Sealed Cartridge Bearings
Rear Hub	Alloy, E-bike specific, Double Sealed Cartridge Bearings, 12mm x 148mm Boost Through Axle, 32 Hole
Front Hub	Alloy, Double Sealed Cartridge Bearings, 15mm x 110mm Boost Through Axle, 31mm Torque Caps, 32 Hole
Spokes	DT Swiss Champion 2.0mm, Black Stainless, Brass Nipples
Rims	WTB KOM Trail i30 TCS 2.0 System, Sleeved Joint, Super Tough Construction, Tubeless Ready, 32 Hole
Tyres	Maxxis Assigai WT, TR, 27.5" x 2.5" 120TPI, EXO + Sidewall Protection, 3C Maxx Terra, Dual Compound, Folding Bead, Front, Maxxis Assigai WT, TR, 27.5" x 2.5" 120TPI, Double Down casing, 3C Maxx Terra, Dual Compound, Rear
Shift Levers	SRAM X01-E Eagle, Single Click, MMX, 12 Speed
Front Derailleur	N/A
Rear Derailleur	SRAM X01 Eagle, 12 Speed
Cassette	SRAM PG-1230 Eagle, 11-50, 12 Speed
Chain	SRAM Eagle, 12 Speed
Crankset	RaceFace Affect E-Bike, 165mm, ISIS with X-SYNC Direct Mount 34T for Bosch Gen 4, Black
Bottom Bracket	N/A
Seatpost	Crank Bro High-Line 3, 30.9mm, M/L 150mm Travel, High-Line Ball Socket Remote Lever
Seat	Whyte Custom, Triple Panel Design
Bar	RaceFace Turbine R, 20mm Rise, 35mm Bar Bore, 800mm Wide
Stem	RaceFace Atlas, 35mm Bar Bore, 35mm Extension
Grips	Whyte Lock-on V Grip
Front Brakes	SRAM Code RSC, 4 Pot with Sintered Metal Pads, 200mm Rotor
Rear Brakes	SRAM Code RSC, 4 Pot with Sintered Metal Pads, 200mm Rotor
Brake Levers	SRAM Code RSC, MMX
Pedals	None
✓	Indicates an upgrade or improvement over previous version
✓	Indicates an upgrade or improvement over the model below

The E-180 RS is an exceptionally fun, fast and capable 180mm travel Enduro-focussed mountain bike. Whyte OTO geometry, Fox Suspension and Code brakes make a fantastic MTB package able to get you down the toughest trails in record time - and the motor helps you power back to the top to do it all again and again.

Uncompromised Whyte OTO geometry combined with an ultra-low centre of gravity means outstanding handling, balance and control. A complete eSystem from Bosch means reliability and unbeatable backup. And no big hole in our downtube to fit the battery in (it loads through an inline port at the bottom) means maximum structural integrity for minimum weight.

The brand new high-torque Bosch Gen 4 motor is super-compact with exceptionally smooth power delivery which simulates normal pedalling, and range anxiety shouldn't be an issue as we fit a powerful 625Wh battery as standard.

Dropout Code	DROPWH18
Shock Stroke and Sag Setting	65mm, Sag 16mm (25%) to 19mm (30%)
Reducer Bush Widths	22mm x 8mm, no hardware at the rear
Eye to Eye Length	230mm

G-170 GRAVITY ENDURO

TOTAL COMPOSURE ON EXTREME TERRAIN

Our latest generation G-170 is highly evolved, ultra-surefooted and built to devour extreme terrain all day long. Whyte Quad 4 suspension, combined with a light, responsive and efficient pedalling SCR frameset, keeps you fast and fresh however far away you're hunting for thrills. Add our sealed InterGrip seat post clamp system, masses of mud room and UK weatherproof construction and you've got the most versatile full gas all-rounders available.

Singled out by MBR Magazine as Editor's Choice with a perfect 10 score and crowned PinkBike's Value MTB of the Year in the latest awards, the G-170 platform continues to receive rave reviews for its exceptional speed, balance and control on the most challenging trails. The short-offset geometry has been praised for its well-centred riding position and comfortable sizing, while the increased torsional stiffness of the Carbon front triangle, combined with the optimised suspension kinematics, provide improved initial sensitivity and increased progression for a truly capable ride. With enough mud clearance to get you through even the harshest winter, there's even plenty of space in the front triangle for a full-size water bottle too!

For 2020 the G-170 continues with the same award-winning geometry incorporating our "OTO" optimised trail offset that utilises the acclaimed short fork offset pioneered on the S-150.

Consolidated to 3 models, the line now incorporates a 27.5 alloy S spec frame as well as two carbon 29ers, in the C RS and C Works spec

All models see the introduction of new and improved suspension offerings from RockShox, as well as new dropper post specifications throughout.

Reviews

Whyte G-170 S Wins Pinkbike's 'Value Mountain Bike of the Year award

Whyte G-170 S Featured in mbr's editor's choice 2018

"It's a full-blown gravity focused race weapon" - Whyte G-170 S 10/10 Test Winner - mbr

"The Whyte G-170 Works 29er is an outstanding bike, a thoroughbred racer in both intent and execution it's a bike for stealing podiums" - Whyte G-170C Works 29er - Enduro Magazine

"One for racers and white-knuckle descenders, the Whyte G-170 RS is a potent race-weapon, and the 'hardcore' choice in the range." "If you have the skills to unleash the beast, the G-170 delivers a firm uppercut of fun." - G-170C RS - Enduro Magazine

"Super-capable gravity bomber that's well-balanced and loads of fun to ride" G-170C WORKS - mbuk

"The G-170's suspension is seriously capable and keeps the rear wheel glued to the trail even when I feel like I'm right on the tyre's limit" - G-170C WORKS - mbuk

"Speed really was where this bike shined ever so brightly; it's so stable due to its length and excellent suspension that you really do feel like there is not much that you can't do." - G-170S - AMB Magazine

The G-170 S scored the perfect 10 and was named Editor's Choice by MBR as well as being crowned Best Value MTB in the 2018 Pinkbike awards. Available in the UK from late June 2019, the v2 spec adds RockShox's new Lyrik fork with a Charger 2 damper, an upgraded rear shock and improved brakes to the award-winning mix.

The v2 S is loaded with the very latest spec developments in Enduro/Trail bikes, like the new WTB ST i30mm 2.0 rims which further improve the performance of the front and rear specific TCS tyres, whilst maintaining neutral handling.

The G-170 platform is designed around the Whyte's performance-enhancing Optimised Trail Offset geometry which also features the most compact seat-tubes possible on all sizes - meaning riders can choose the size with the reach they prefer, and simply adjust the seat-post to fit.

The RS uses the same highly developed frame as the Works bike, as used by our International EWS race team. The 29er wheels make this the fastest Gravity bike we've ever created.

This bike is ready for anything you want to throw at it, from hard-core trail riding to EWS Enduro racing. With its open front triangle design it is possible to fit various options of rear shock including coil shocks and still carry a full size water bottle.

The G-170 platform is designed around the Whyte's performance-enhancing Optimised Trail Offset set geometry which also features the most compact seat-tubes possible on all sizes - meaning riders can choose the size with the reach they prefer, and simply adjust the seat-post to fit.

Dropout Code	DROPWH18
Shock Stroke and Sag Setting	65mm, Sag 16mm (25%) to 19mm (30%)
Reducer Bush Widths	22mm x 8mm, no hardware at the rear
Eye to Eye Length	230mm

The default choice of our Race Team, this bike is built to handle whatever you throw at it - at the pace you need to win. Whether you're riding the world's most extreme EWS courses or your local trails, there's nothing better.

The G-170 platform is designed around the Whyte's performance-enhancing Optimised Trail Offset geometry which also features the most compact seat-tubes possible on all sizes - meaning riders can choose the size with the reach they prefer, and simply adjust the seat-post to fit.

The G-170C Works 29er has extra width built into the rear chainstays allowing the rider to fully exploit future developments in wide high volume tyres up to up to 29 x 2.5" whilst maintaining mud clearance.

S-150 TRAIL ENDURO

AGGRESSIVE TRAIL AND FAST ENDURO

The S-150 broke the long-travel 29er mould with its race-winning pace and exquisitely balanced suspension and geometry. Developed to expand your riding and with enough travel to get you out of trouble, it's an aggressive trail bike more focussed on ultimate speed - but with a foot in Enduro. Happiest on gnarly terrain, this super-capable go anywhere hard-core trail bike is at home wherever you ride, from challenging local trails to the world's fastest Enduro stages.

Supplied standard with 29er wheels the S-150 is punchy, fast and precise with real sense of speed and excellent trail feedback. Or 'Switch' to the option 650b x 2.8" wheels and tyres on 35mm rims and enjoy a whole new level of traction and small-bump response with previously unimaginable levels of cornering control and grip.

Incorporating Whyte's latest OTO (Optimised Trail Offset) geometry system, many of the S-150's attributes stem from the shorter fork offset Whyte pioneered on this bike.

For 2020 Season we are running 3 models, featuring the alloy S spec frame as well as two carbon models in the C RS and C Works spec.

All models see the introduction of new and improved suspension offerings from RockShox, as well as new dropper post specifications throughout and Shimano's all new 12 speed SLX groupset on the S spec.

Reviews

"Totally intuitive ride quality, solid frame and confident swagger – the whole Whyte S-150C RS experience exudes calmness and confidence" S-150C RS test winner - mbr 150mm travel 29ers

"The S-150C Works is fast, capable and a ton of fun, seeming to hold its line better than any bike I've ridden" ... "Whyte's top-end S-150 C Works marries progressive geometry to a quality carbon fibre frame and a fully loaded spec to produce a 150mm travel trail bike that's incredibly planted and really comes alive when you really start charging hard." - off-road.cc

"Exquisitely balanced suspension and geometry translate into a fast, capable yet playful package" - 5/5 MBUK

"The Whyte S-150 is the bike UK riders have been waiting for, versatile, confident, and outrageously fun to ride fast. It's a bike that works exceptionally well, everywhere and in every way!" – ENDURO

"It's odds-on to become the new benchmark 29er...Great geometry, sizing and suspension. Keen pricing too, given that you can still walk into a shop and sit on one" – mbr

"Whyte's S-150 Carbon RS is as up-to-the-minute as a trail bike can get. It's carbon, it has big wheels, it ticks all the long, low and slack boxes, and hey, that's wonderful, but what makes the S-150 stand out in the present long-travel trail bike mosh pit can only be experienced by riding it. It pedals, steers and handles less like a bicycle and more like you have zipped on a mountain bike super power suit. In less flowery language: "For sale: 150-millimeter-travel dual-suspension 29er that will make you beg to ride every day. Needs nothing" – Pinkbike

"Whyte has done a great job with the suspension, stiffness and geometry. It's a fast, fun and responsive trail shredder that should suit riders who want a bike that balances agility with stability, and efficiency with comfort" "Whyte's latest trail bike is a do-it-all ripper. It's a 150mm-travel, plus-compatible 29er that can take on virtually any trail with aplomb" - Bike Radar

"It's supremely balanced, it pedals efficiently and - most of all - it's a hell of a lot of fun on the descents" - S-150C RS AMB Magazine

"The gnarlier and trickier the trail, the more the Whyte S150 C RS shines brightly amongst the rest of the trail bikes out there" - S-150C RS - European Design Award

Latest generation Whyte OTO geometry, 150mm of travel and 29er wheels make this trail bike fast and controllable in every situation. A wide main pivot with oversize hardware is a perfect way to get the power down.

The S-150 was designed around a wide range rear cassette and the new S-150 S gets Shimano's 12 Speed SLX groupset, with trickle down technology from XTR and its massive 10-51t gear spread.

Maxxis 3C compound is peerless in the level of front end grip it provides. The 30mm wide rims create a stable bead platform for these tyres so you can push them right to the limit.

With its sculpted carbon front triangle the RS certainly looks the part - add Whyte OTO geometry, Eagle GX, the fantastic RockShox Pike Select + and Deluxe Select + suspension and you'll understand why this multi-award winning model sets the pace.

S stands for Switch - the ability to fit 650b wheels with 2.8" tyres and still have UK levels of mud clearance. Our wheel kits switch into your bike in the time it takes to go back to your car and change the Eagle cassette.

Maxxis 3C compound is peerless in the level of front end grip it provides. The 30mm wide rims create a stable bead platform for these tyres so you can push them right to the limit.

Our Whyte Enduro team have a secret weapon - the S-150 Works is their bike of choice for the more all-round events.

There is a wish list spec on the Works, but stand-outs must include the 30mm hookless Whyte carbon rims hand-laced onto Hope Pro4 hubs, Bike Yoke Revive dropper post with its super-low stack height, and a RockShox Super Deluxe Select + rear shock.

S stands for Switch - the ability to fit 650b wheels with 2.8" tyres and still have UK levels of mud clearance. Our wheel kits switch into your bike in the time it takes to go back to your car and change the Eagle cassette.

T-130 TRAIL

PLAYFUL PERFORMANCE FOR ULTIMATE FUN

Playful and immensely capable Whyte's Benchmark mid-travel Trail platform received a massive update for 2019 with a ground-up re-design incorporating Whyte's latest OTO (Optimised Trail Offset) geometry system which took the dynamic-riding, full-gas personality of its award-winning predecessor and turned it up to 11.

Latest generation Whyte Trail Geometry and suspension kinematics combine with 650b 2.6 tyres to provide traction, cornering grip and all-terrain capability that has to be ridden to be believed – all in a sleek UK weather-proof package. If fun tops your must-have list, the T-130 could be your ultimate trail bike.

The OTO geometry puts the rider in a more central position and offers enhancements to steering stability and a more natural feel, while custom tuned rear shocks provide real benefits in performance.

For 2020 Season we are running 4 models, featuring two alloy frames, the SR and S spec and two carbon variants in the C R and C RS models

All bikes see the introduction of new and improved suspension offerings from RockShox as well as new dropper post specifications throughout.

Reviews

"Fast and direct, the latest Whyte T-130 S is an amazing trail bike. It's packed with cutting-edge tech too, like the super-short offset and single-ring frame design" - T-130 S - mbr

"A versatile all-rounder with big-hit capability"...It's strength, however, is its versatility. It's handy enough up a hill not to be a chore on long rides, while its shape means it's likely you, rather than the bike, gives up first" - T-130C RS - Bike Radar

"Outstanding flat-out handling and frame stiffness; excellent ready-to-ride suspension balance; local bike shop sales, set-up and servicing gains; great value compared to other shop-sold bikes" - Bike Radar

"There's no trace of flex or fumble, even when really pushing your luck, and we regularly kept pace with the longer-travel bikes on black-run bombing raids" - T-130 SR - Test winner MBUK

The award-winning second generation T-130 platform is all about maximum fun, wherever you ride. Combining climbing efficiency with a hooligan attitude to descents, it uses every bit of its 130mm of suspension travel to keep you grinning from ear to ear.

The T-130 OTO geometry was designed around a shorter 37mm offset fork. The extra front end grip this creates allows us to make the most of the 140mm travel fork, fully exploiting the capabilities of the chassis, the more neutral handling and the 2.6" tyres.

The SR is our most affordable spec, combining Fox Performance suspension with a Shimano based 11 speed drive-train - the result is a massively capable bike for an affordable price.

S-120 XC / TRAIL

VERSATILITY AND VELOCITY

Incredibly confident with a voracious appetite for speed, the S-120 is an exceptionally versatile all-round MTB using our new 120mm 29er Trail platform. Building on the ground-breaking T-129, its superb suspension and technical trail handling redefines what you can expect from a 120mm bike, whether you're powering up the climbs, shredding the trail or charging the descents.

The S-120 is perfect for the rider that wants speed, but still wants to feel the trail beneath them – more of a rally car than a monster truck.

For 2020 Season we are running 3 carbon models in the C R, C RS and the C Works spec.

The CR and C RS models see the introduction of new and improved suspension offerings built around the Fox Step cast 34 front fork, providing a significant weight and performance advantage, as well as new dropper post and Maxx speed compound tyres throughout.

With the late arrival of the new 12 speed XTR group set into the market place this season, the S-120 C Works will continue unchanged with its wish list spec of Fox Factory and Shimano XTR componentry.

Reviews

"This bike is just an absolute flat-out charger. More rally car than monster truck, it's visceral, agile and involving... The most compelling thing I can say is that if I had to hang up the GoPro, stop reviewing right now and had to pick a bike to take with me as a keeper, it would be this bike." - S-120C Works - Guy Kesteven

"It's a bike that encourages you to treat the trail like a natural pumptrack in order to keep cruising along..."The S-120 has a calm and stable nature that's usually not found on a shorter travel bike, and if your cross-country rides tend to be extra technical the S-120 is worth a look" - S-120C Works - Pinkbike

"The new super-versatile Whyte S-120C RS 'stretches what you can expect from a short-travel bike' with 'superb tech handling and easy velocity'..."not only did we smash out some climbing KOMs on Strava, but it also took the flat-out descents of the Ard Moors Enduro in its stride" - S-120C RS - MBUK

"If you want a proper pinner that charges enduro-hard on descents but is still efficient enough to hold its own in a marathon XC situation, then Whyte's new 120mm 29er literally stretches what you can expect from a short-travel bike" - MBUK

"Unlike on a lot of lighter 120mm frames, there's no trace of twist or twang from either end. That means you can make the most of the long-reach geometry and slack head angle to push the bike really hard into turns or charge through rock and root spreads. - S-120C RS - Bike Radar

The S-120 is perfect for the rider that wants speed, but still wants to feel the trail beneath them, it's more of a rally car than a monster truck. Incredibly confident with a voracious appetite for speed, it's an exceptionally versatile all-round MTB using our latest 120mm 29er Trail platform.

Superb suspension and technical trail handling redefine what you can expect from a 120mm bike, whether you're powering up the climbs, shredding the trail or charging the descents.

The S-120 geometry was designed around a short 44mm offset fork and the exceptional Fox 34 Step Cast platform is the perfect choice for benchmark performance.

900 SERIES TRAIL HARDTAIL

XC AGILITY WITH BLACK RUN ABILITY

Skilled riders and magazine reviewers know you don't need a rear shock to get rad on the toughest trails. You just need a Whyte 900 series hardtail. Already hailed as the greatest Trail Hardtail ever, we've amped up the ability right through the range with our latest generation short offset geometry, so you can charge climbs, dominate descents and rip out of corners better than ever with the pure lines of our original dedicated SCR hardtail frame.

The new Season models include some major improvements:

All models now incorporate Whyte's latest OTO (Optimised Trail Offset) geometry system which increases the Trail for improved steering stability and moves the mass of the fork and wheel closer to the steering axis for a more neutral steering feel.

All the frames have been updated - we have increased chain stay lengths by 5mm for even more confidence inspiring handling and all models are now fitted with new Dropper posts. With this in mind, we have replaced the Intergrip system with a forward-facing slot and seat binder. In addition:

901 - gets OTO geometry, an all-new RockShox Gold 35mm stanchion fork, Eagle 12 speed and the new Whyte drop.it II dropper with a more ergonomic lever

905 - receives improved OTO geometry, RockShox latest Pike Select RC fork

909 - features the all new Shimano XT 12 speed

Reviews

Whyte 905 Featured in mbr's editor's choice 2018

"Whyte claims that this is the best 905 it's ever built, and we agree. It's also the best hardtail we've ridden, period, and easily deserving of a perfect 10 rating" 10/10 mbr

"With the raft of updates and some great first impressions, I'm already starting to think the new Whyte 905 could be the perfect UK hardtail" - 905 - mbr

"Whyte has raised the bar to the height of a pole vault" - 905 - mbr

"Takes on the daftest lines with total confidence" Enduro MTB

"For those looking to smash out ride after ride without the complexity and expense of a full suspension bike, it's faultless" Enduro MTB

"900 series frame is still the hardtail benchmark for XC agility and speed with black run attitude." What Mountain Bike

"If you definitely only have room for one bike, this is surely a strong contender for that precious shed space" - 909 - Singletrack

"The Whyte 905 redefines the limits of production hardtail performance" - 905 - mbuk

With the 901 it's all about the geometry - it will make you feel more confident in all situations than any hardtail you've ever ridden. The latest 901 comes fitted with exactly the same frame as the 10/10 award winning 905.

A frame size adjusted Whyte Drop.it post II comes as standard and 4 Pot brakes with Metal Sintered Pads give the rider the very latest in Trail control.

The 901 rolls on 2.8" Maxxis high volume TR 3C compound tyres which combine with the WTB ST TCS 2.0 i35 rims to create more comfort, more control and more fun.

The award winning, MBR "Editors Choice" 10/10 905, defines the modern Trail Hardtail. The latest model adds RockShox's new Pike Select RC forks (with Charger RC damper and short 37mm offset) combined with 2.8" tyres to make this 905 the best yet.

The 905 brings ideas directly from our Whyte Enduro team, from the thicker V-Grips to the use of 170mm cranks, which bring the rider 5mm closer to the ground without compromising pedal clearance.

WTB STp i35 35mm wide TCS rims combined with Maxxis 2.8" high volume TR 3C compounds, create more comfort, more grip and more fun.

800 SERIES TRAIL HARDTAIL

FUN, SPEED AND SURE-FOOTED CONTROL

We don't make ordinary bikes, we make extraordinary ones. Genuine Whyte trail bike DNA and a wealth of features originally developed for our high-end mountain program means that each model in the 800 Series is able to perform at a level way beyond the previous level of its price.

The latest versions of all our 800 Series frames benefit from some further improvements for the coming season. Whyte OTO (Optimised Trail Offset) geometry system means trail-ready handling with outstanding control and confidence. We've added this feature and moved to a 142mm Boost QR rear end which gives a 3mm wider chain line and provides more chain clearance for the rear tyre and a stronger rear wheel as the hub flanges are wider.

Forks: We have again improved the forks throughout the series using RockShox's new Recon "B spec" lowers which allow you to run up to 2.8 tyres. These new forks not only have great performance, but they come with 15mm through axle and "Fast Black" stanchions, bringing a great contemporary look to these bikes.

Rims: We have also upgraded the rims on the 805 and 806 which use WTB's new ST i27 TCS 2.0

805 and 806 both come with Tubeless-Ready wheels and the 801 and 802 have Tubeless-Compatible rims allowing the rider to easily upgrade to get a real performance gain.

In 2018 we introduced SCR and our (then) latest generation geometry to the 800 line, bringing real trail bike performance and a wealth of relevant USPs to more affordable price points, and further differentiating this range from European and US competitors. In 2019 we further developed these bikes with the adoption of some of the technology previously used on our innovative, high-end bikes. Bars and stems were unified to 780mm (760mm on the compact 802 and 806) and a 40mm stem extension on all sizes of bike.

All the 800 series bikes feature wide-range 11-46 cassettes, combined with Shimano Deore 10 speed shifting.

They also feature our BBX cable access system and are compatible with easily fitted Whyte drop.it dropper posts - available in 125mm, 150mm and 170mm lengths.

Reviews

"All the attitude of the amazing 901 in a more affordable package" mbr

"The Whyte will run rings around the competition out on the trail" mbr

"Great shape and sizing make the 801 an instant hit" mbr

✓	Indicates an upgrade or improvement over previous version	
✓	Indicates an upgrade or improvement over the model below	

Our 800 hardtails have always offered a fine blend of fun, control and speed. Our SCR design, with no need for an inner chainring clearance, means our engineers were able to re-shape our custom chainstays for improved agility and a more dynamic ride.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 780mm bar. The 800 series bikes also feature a 120mm travel fork, for trail-bike levels of performance.

This latest generation frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

✓	Indicates an upgrade or improvement over the model below	

The 802 is available in the XS size. All sizes have more compact geometry than the 801 or 805. That means slightly less length for more comfortable reach, suiting riders with shorter proportions.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 760mm bar. The 800 series bikes also feature a 120mm travel fork, for trail-bike levels of performance.

Our aluminium hardtails have always offered a fine blend of fun, control and speed. Our SCR design, with no need for an inner chainring clearance, means our engineers are able to further reduce the length of the chainstays for improved agility and a more dynamic ride.

The 800 Series frame uses the very latest Whyte geometry, based around a longer top tube, a short stem and wide 780mm bar.

The BBX internal cable routing keeps cables clean and clear of grime whatever the conditions, while Whyte's surefooted geometry will make you want to ride come rain or shine. It also allows the rider to easily upgrade to the Whyte Drop.it II dropper post.

WTB STP i27 TCS 2.0 System rims with Maxxis TR front and rear specific tyres combine to make a Tubeless Ready package, with enough grip to fully exploit the 800 series trail geometry.

600 SERIES SPORTS HARDTAIL

PACKING A REAL TRAIL PUNCH

Supreme control and rider confidence are the hallmarks of every Whyte mountain bike. By using latest generation Whyte geometry, a new 120mm travel frame was developed for our 600 series for 2019 taking MBR's 2017 Hardtail of the Year category winner to new heights. These UK designed bikes pack a real Trail punch and offer the perfect introduction to the performance benefits of Whyte.

Further improved for the season ahead, the latest generation 600 series hardtails have upgraded forks with stylish black stanchions adding a really contemporary look to their outstanding on-trail performance.

Drive-trains are 2 by 9 Shimano across all 3 bikes, making them more trail ready and Whyte Trail 25 Tubeless Compatible rims give great upgradable potential.

760mm bars (740mm on the smaller 603 sizes) and 40mm stems, combine to give a modern look and function. We use the same high-quality, Whyte-designed grips on all our trail bikes to create a family feel across the whole range. The 600 series bikes feature our BBX cable routing system and are all Whyte drop.it post up-gradable.

Reviews

"The ride of the 605 is comfortable and lively...The relaxed and agile bike carves through turns with ease"
Enduro

"Whyte's affordable 605 hardtail might not break the bank, but when it comes to on-trail performance it blows most rivals out of the water thanks to a frame sporting bang-up-to-date geometry and well-chosen components"
offroad.cc

Whyte's design team have given the latest 600 series frame the Trail treatment. A 120mm fork, wider 760mm bar, shorter stem, wider grippier tyres and even our Enduro developed V-grips, make these the most trail-ready bikes in this price category.

You'll find it hard to believe the 603 is Whyte's entry level mountain bike: with carefully chosen, branded parts and a high quality, latest generation frame it has all the hallmarks of Whyte's award winning DNA.

The latest frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

29ER TRAIL HARDTAIL

EXTRA SPEED FOR TECHNICAL TRAILS

Whether you're a bigger rider or just into bigger mileages and higher speeds, nothing can match 29er wheels for making tough trails easy and long climbs effortless. What makes our 529 and 629 bikes totally different from the rest is that we teamed these advantages with our award-winning Optimised Trail Offset Geometry and our super-tough yet smooth-riding, thru-axle Boost frame to let you take that extra speed and efficiency onto gnarly, technical trails.

Single chain-ring specific frames with shorter and wider-set chain-stays mean dynamic handling and sequential shifting simplicity. Reduced Offset 120mm travel thru-axle forks bring the benefits of this performance-enhancing innovation, pioneered on our S-150, to the trail-riding 29er hardtail audience.

These naturally high velocity rides are massively versatile too. The latest version 529 and 629 now feature RockShox's new Recon "B spec" lowers which allow you to run up to 2.8 tyres. These new forks not only have great performance, but come with 15mm boost through axles and "Fast Black" stanchions. Rims and tyres get wider, using 2.3 /2.35 Maxxis tyres fitted to WTB ST i27 TCS 2.0 rims, helping to enhance the frames' additional handling capabilities. Featuring our BBX cable entry system, the 629 now comes supplied with our all new Drop.it II dropper seatpost and the 529 is easily upgradeable.

These bikes represent the very latest thinking in hardtail design and Whyte is offering a truly different choice for the 29er hardtail customer. So, whether you're racing, using your skills to hunt thrills or heading far into the hills, there's a very big advantage to be gained by thinking big when you think Whyte.

The new 529 comes fitted with a RockShox Recon B Spec fork which gives more mud clearance and allows up to a 2.8" tyre to be fitted.

Our proprietary OTO & SCR technology bring increased balance and control to the 29er trail hardtail category.

The new frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.

JUNIOR AND YOUTH MTB

We've downsized everything except the performance, so you can start them right with a Whyte. Our Junior and Youth bikes set a new standard for MTB performance and make the gift of a truly great kids bike more affordable.

JUNIOR 20" HARDTAIL - PERFECTLY BALANCED LIGHT-WEIGHT PERFORMANCE

Recommended for riders between 110 and 125cm tall.

YOUTH 24" HARDTAIL - CONTROL AND STABILITY TO TAME THE TRAIL

Recommended for riders between 120 and 140cm tall.

YOUTH 26er TRAIL HARDTAIL - 403 & 405 - WE'VE DOWNSIZED EVERYTHING EXCEPT THE PERFORMANCE

Recommended for riders between 135 and 152cm tall.

SPORTS/TRAIL HARDTAIL – 120mm 604 COMPACT X-Small - PACKING A REAL TRAIL PUNCH

Available in X-Small size, it's recommended for riders between 145 and 155cm tall.

TRAIL HARDTAIL – 120mm 802 & 806 COMPACT X-Small - FUN, SPEED AND SURE-FOOTED CONTROL

Available in X-Small size, they are recommended for riders between 145 and 155cm tall.

TRAIL/ENDURO HARDTAIL – 130mm 901 X-Small - XC AGILITY WITH BLACK RUN ABILITY

Available in X-Small, it's recommended for riders between 148 and 157cm tall.

YOUTH 26er TRAIL SUSPENSION – 120mm - TAKE THE ROUGH WITH THE SMOOTH

Recommended for riders between 130 and 150cm tall.

TRAIL SUSPENSION – 130mm T-130 SR & S X-Small - BENCHMARK PERFORMANCE FOR ULTIMATE FUN

Available in X-Small, they're recommended for riders between 145 and 157cm tall.

Reviews

"The excellent Whyte 403 offers a 'grown up' ride while serving up lashings of confidence, reliability and above all fun to the most important mini-shredder in your life" Enduro Mountain Bike Magazine

"Whyte mountain bikes are some of the most desirable bikes around at the moment - go to any trail centre and you're bound to see loads of them in 26" wheel and adult sizes. The 203 is their brand new 20" wheel offering for the younger age range" - 203 - Cycle Sprog

A perfectly balanced, lightweight 20" wheeled trail bike offering fantastic confidence and control to our youngest riders.

Boasting a light-weight multi-butted frame with full internal cable routing, the 203 combines a light-weight custom offset rigid alloy fork with high air-volume tyres for maximum surefooted stability

Powerful hydraulic brakes with 140mm rotors provide plenty of easy stopping power for even the smallest of trail rippers.

Recommended For Riders Between	3'7" - 4'1" 110-125cm

The 303 takes the trail taming characteristics of Whyte geometry and combines them with a light-weight frame and fork, built for 24" wheels.

Light-weight construction combined with high-air volume tyres give a high quality ride with less trail chatter.

Powerful hydraulic brakes provide plenty of easy stopping power.

We've downsized our maximum confidence Trail geometry and fitted air sprung forks that properly work for lighter pilots so their rides are full of thrills not spills.

The chain-set is sized for shorter legs, a single ring transmission provides simple, instinctive, sequential shifts but still has the gears for every climb and the trigger shifter will help ease the eventual transition in to adult bikes.

The 403 also comes with Whyte's own easy to use Get-a-Grip seat post clamping system allowing the post to be raised or lowered on the trail - even with cold hands.

We've downsized our maximum confidence Trail geometry and fitted air sprung forks that properly work for lighter pilots so their rides are full of thrills not spills.

With SRAM NX 1 by 11 spec and a trigger shifter, the 405 really is a scaled down version of our award winning 900 series bikes. We have specced an XSYNC Direct Mount chainring so multiple chainrings are available to tune this bike to the size of the rider.

The 405 also comes with Whyte's own easy to use Get-a-Grip seat post clamping system allowing the post to be raised or lowered on the trail - even with cold hands.

Using a frame that is derived from our multi-award winning T-130 platform and featuring confidence-inspiring Whyte Geometry, the T-120 offers an ideal introduction to the benefits of Whyte trail suspension.

Built around a perfectly balanced 13" frame with 26" wheels, this bike provides an astonishingly capable platform for a Junior rider to progress to the next level.

The T-120 also comes with Whyte's own Get-a-Grip seat post clamping system. This easy to use clamp allows the post to be easily raised or lowered on the trail, even with cold hands.

GRAVEL

ALL ROUND VERSATILITY

Our GX bikes are versatility defined. On-road, off-road or both in the same ride, our uniquely capable, effortlessly comfortable yet efficiently fast Friston and Gisburn bikes set a new standard for any-ride all-rounders.

In fact, we've pushed the off-road boundaries of drop bar bikes so far we've had to make our own components such as a 500mm wide riser bar, just to keep up. That's because our MTB inspired relaxed head-angle, short stem, wide bar, stretched top-tube geometry will keep you in control way beyond what most 700c bikes can cope with.

Our SCR technology and its accompanying Whyte geometry make these GX bikes very different to the competition. For the latest generation we have increased the rear stays slightly to allow up to a 46c tyre or the new generation of 650b Plus wheel/tyre combinations - and with disc brakes, it's just a case of switching them over. Mudguard and rack mounts feature on both models. The latest Gisburn uses Shimano's new GRX groupset with a 30mm alloy axle Easton EA-90 crank and we have added our new Drop-it II Dropper post with a left side Shimano integrated brake lever/remote, giving the rider the ability to more easily adjust the seat post on the fly.

Reviews

"Not only is it the most surefooted fun by far as we swerve and surf the singletrack north back to High Paradise Farm, it's also a surprisingly smooth, efficient cruising and practically detailed, weather sealed ride on the road too, putting it right at the progressive edge of all-round adventure enjoyment"
Cycling Plus

"Radically controlled, capable, comfortable, practical and surprisingly swift all-rounder" Cycling Plus

The Friston takes everything we've learnt from MTBs and puts that knowledge into a great value Gravel/Adventure bike package. With hydraulic discs, ground-breaking geometry and SRAM's Apex 1 groupset.

We have applied our unique Whyte frame geometry to the Friston, creating a supremely versatile all-terrain bike. It's equally at home riding your favourite bridle path, winter training or even commuting.

A straight bladed carbon fork with a tapered steerer tube, internal hose routing and 15mm through axle, give this bike great front end stiffness and steering precision.

A truly ground-breaking Gravel/Adventure bike with MTB-inspired geometry, tubeless ready wheels and tyres, hydraulic disc brakes and Shimano's much anticipated new GRX 1x groupset - and a dropper post so you can make the most of its capabilities on steeper descents.

Whyte geometry makes this bike exceptionally competent and controllable off-road. 1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. Full hydraulic disc brakes add stopping power and control.

Whyte's straight bladed carbon fork with its tapered steerer tube and 15mm through axle gives this bike great front end stiffness and steering precision. Combined with an ultra-wide "Whyte 500" riser bar which allows the rider to truly exploit the radical geometry.

ROADPLUS ADVENTURE

TAKE THE ROUGH WITH THE SMOOTH

Whatever surface the road throws at you there is now a road bike that really can cope with it all - the Whyte Glencoe. It purrs along on smooth tarmac – but when the going gets tough the Glencoe really comes into its own, providing supple grip and cossetting comfort, encouraging you to push forward where you'd normally pull back and carry more speed, grip and confidence into the bend. If you love to ride but have had enough of Britain's torn-up tarmac, the Glencoe is right up your street.

The latest version sees significant changes: We've added a carbon fork, improved the wheel package with wider rims, DT Swiss spokes and the same rear hub as the Wessex One and revised and straightened the seat tube. Custom 55mm wide mud guards are available and the frame is also rack compatible.

Reviews

"Whyte's Glencoe combines an aluminium frame with 650B tyres and a very different approach to geometry to provide a supremely relaxed, comfortable and confidence-inspiring ride that excels on rough roads and fast descents. Swing a leg over the Glencoe and the first thing you notice is the massively wide handlebar. Within a few miles, and especially after a couple of descents, it becomes very natural and comfortable. I was bombing down all my favourite descents with more speed and less nervousness than any endurance or gravel bike I've tested recently. The wide bar gives you plenty of control through the bends and despite what you might think about the short stem, there is absolutely no twitchiness to the steering, it's all very calm and relaxed" - road.cc

"Swooping down road descents at 40mph is a thoroughly composed experience on the Whyte" Cycling Plus

"Amazingly stable and comfortable ride ideal for rough roads" - road cc

"The Glencoe represents an exciting and radical reinterpretation of what a modern road bike could be" road.cc

The Glencoe combines our Gravel/Adventure frame with Road Plus tyres. These high air volume 650b tyres have the same rolling circumference as a 700c X 28c setup and give huge levels of comfort and security on even the roughest road surfaces.

1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. TRP mechanical/hydraulic disc brakes add stopping power and control.

Whether you're an inner-city, year-round commuter or a C or D back-road rider, the Glencoe is the perfect bike to give you control on unpredictable surfaces. The Glencoe is the most versatile all-round road bike we have ever made.

CARBON PERFORMANCE ROAD

ANY ROAD, EVERY DAY

Designed from the outset to excel in all conditions, everything we've learned about control, comfort and year-round UK weather-proof construction is included in the multi-award-winning Wessex.

Whether you're gearing up for a summer sportive or a bleak mid-winter training ride (complete with the easily integrated mud-guards) the Wessex proves that you no longer have to sacrifice searing speed and real performance for rugged reliability and all-weather control - you really can have it all!

Reviews

"Outstanding comfort and versatile design make this a great bike for long rides, all year round it'll have you seeking out the roughest roads for fun!" - road.cc

"Put simply, the Whyte Wessex is a bike that's had us redefining our own conceptions of an 'all-rounder'" road.cc - Endurance Bike of the Year

"Perfect for the enthusiast who demands performance whatever the weather" European Design & Innovation Award

"The Wessex could well be the only road bike that most British riders need" - Cyclist Magazine

"A superbly comprehensive and controlled, great value all-weather warrior for UK riding" Cycling Plus

"Beautifully blended road warrior makes year-round UK riding fast, safe and enjoyable" Cycling Plus

"The Whyte Wessex won our hearts. With its keenness to encourage the ride, it somehow begs you to try harder and not give up, to sprint over the crest, spot the next rider and chase them down. It's not about racing, it's about rewarding your every input and we just love it for this quality. All were more than capable of getting around one of the toughest sportive routes we know it was just a case of how much fun we were able to pack in and it was the Whyte that put the biggest smile on our faces" - Bikesetc

When we set about designing this bike, we wanted to create an even simpler version of the Wessex. The 1 x 11 drive train gives 11 usable gears with no overlaps and utter simplicity.

30c Schwalbe G-One Speed tyres and WTB tcs 2.0 rims give all the advantages of tubeless tyres. The lower pressure creates both comfort and grip to give the security that creates the feeling of confidence in all weather and road conditions.

Hydraulic brakes give one finger control from either the hoods or the drops and the extra modulation allows for complete control in all situations and weather conditions.

The Wessex was conceived to be the ideal contemporary British road bike. Built for all road surfaces, it uses the very latest in tubeless-ready, high air volume 30c Schwalbe G-One Speed tyres on 24mm wide Easton AR rims.

The 2017 road.cc Endurance Bike of the Year and recipient of a European Design and Innovation Award, the Wessex delivers previously unimaginable levels of grip, confidence and control, whatever the weather.

12mm through axles, tubeless tyres, disc brakes and the ability to fit full length mud guards makes the Wessex extremely versatile and capable - and perfect for tough UK conditions.

Ultegra Di2 takes all year-round riding to a new level. With Tubeless tyres mounted on our own Whyte carbon rims and the all new Ultegra disk brakes, consistent control in all weather is guaranteed.

Shimano's new Di2 Ultegra gives the rider more control over shifting. The bar mounted junction box/display displays battery life and allows the rider to adjust shifting settings with ease.

12mm through axles, tubeless tyres, disc brakes and the ability to fit full length mud guards makes the Wessex extremely versatile and capable - and perfect for tough UK conditions.

SPORTS ROAD COMMUTER

LONG-HAUL DURABILITY

Weekday workhorse or weekend warrior – the choice is yours. The definition of reliable road-bike versatility, these multi-award-winning bikes are right at home no matter how far the road takes you, featuring lightweight multi-buttled alloy frames with low maintenance internal cables, combined with carbon forks, tough wheels and Shimano transmission.

We've chosen ideal ride complimenting components such as the latest high volume tyres from Schwalbe, with Shimano shifting and TRP Hy Rd disc brakes for all-weather safety with the latest flat-mount brake fittings. Our bikes tubeless compatible rims for easy upgrading and a wide range cassettes to aid climbing - our Compact Fit bike gets a smaller crankset to match too.

Reviews

"If you want a bike for getting from A to B quickly all year round, and that can cope with what-ever the British roads and weather can throw at it this could be for you" - Dorset - road.cc

A fantastic all-round package. This is the definition of a versatile bike." - BikesEtc

"The ride delivers exactly what it's designed to and will get you grinning with cornering and downhill flair that puts some pure race bikes to shame" - Dorset - BikesEtc

The Dorset features Shimano's 9-speed Sora groupset, with a wide-ratio cassette to make getting up the hills a breeze. On the descents, reliable TRP Flat Mount disc brakes will slow you down safely and easily.

Whether you're commuting longer distances, winter training or entering summer sportifs, the Whyte Road Disc range offers Cyclo Cross durability with pure Road geometry.

A strong alloy 6061 frame, with mudguard and rack eyelets, combined with wide section Offset Rimmed RD-7 rims and TRP Hydro/Mechanical disc brakes will give years of reliable all-season performance.

R7 SERIES

FAST URBAN / COMMUTER

Combining the easy speed of a road bike with the confident control, comfort and see-everything safety of an MTB style flat bar ride position, our Fast Urban bikes cater for the daily commuter, the weekend adventurer and everyone in between.

We use disc brakes on every bike, so weather doesn't decide whether you'll stop. Broad range gears in simple sequential single ring or closer stepped double ring options team with lightweight alloy frames, carbon forks and carefully selected components to shrink distances and flatten hills. Wide, low-profile rims get the most out of the 32c tyres and the addition of two Road+ bikes to our line increase the comfort, speed and control on anything the city street can throw at you. Sealed internal cable routing and colour coded detailing combine with rack and mudguard mounts to make these bikes as practical as they are stylish and swift.

COMPACT MODELS

Our Compact geometry models are tailored to fit riders with a slightly shorter reach making them ideal for many women. With a slightly shorter top-tube and a little more stand over, they offer all the advantages of Whyte geometry and the control and confidence it brings, in a package that fits like a glove.

Reviews

"The latest version of Whyte's nippy round-towner incorporates a couple of mini-trends we're starting to see in hybrids for 2019: single chainrings and fat 650B tyres. With a wide-range gear selection at the wheel there's no real need for multiple chainrings, which makes for a more straightforward gear system. The wheels are smaller than the road-racing size 700C you usually find on hybrids, but with fat tyres they end up about the same size. The fat tyres make for more grip and cushioning, which has to be a good thing round town" - Victoria - road.cc

"High quality kit on a mountain bike-style frame creates a great urban bike." Cycling Plus

The Whitechapel is all about simplicity: a single chain ring and nine gears at the back will give years of reliable urban use.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed manoeuvrability.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle for easy fitment of a rack or mudguards.

32c tyres on 21mm wide rims give the Carnaby both speed and comfort from the toughest urban commute to a open road adventure.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed manoeuvrability.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle for easy fitment of a rack or mudguards.

Featuring mountain bike clutch mech technology and the excellent Deore 11-42 wide range cassette, the Shoreditch has the right gear for any ride.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability and a shorter stem for excellent slow speed manoeuvrability.

A custom rear dropout mounts the hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required. 1 by 10 MTB gearing promises years of reliable urban use and hydro discs guarantee consistent performance.

Combining MTB geometry and parts with road bike wheels and tyres has always been the case with the R-7 line up - but the new Plus tyres takes this to a new level. These high-air volume/low-rolling-resistance tyres are perfect for dealing with 'All Surface' commutes and rides.

The Portobello features massive 650b x 47c tyres to smooth out the road chatter. These deep profile tyres, give the same rolling diameter as 700c x 28c tyres but the extra air volume make them super comfortable and pinch puncture resistant.

A custom rear dropout mounts the hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required.

This lightweight aluminium frame employs compact geometry to make this bike perfect for shorter riders who want a wide-ratio 2x11spd Shimano drivetrain.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required.

Our shaped, butted and uniquely profiled rear stays give all our fast urban bikes a fantastically responsive and comfortable ride.

C7 SERIES

ALL TERRAIN LEISURE

Just because you're not in a hurry, it doesn't mean getting there should be hard work. With all-new mudguard-compatible frames, updated geometry and simplified 2x and 1x drive trains, the massively improved C7 bikes are the very definition of a modern Sports Hybrid - all the confidence and surefooted capability of our modern 29er hardtails, with the practicality of a trekking bike.

These bikes are as lively and enjoyable to ride as they look. Whether you're riding for fitness, fresh air, freedom or just the fun of finding out what's over there, these are the bikes with the clean design, confident handling and breezy speed you need.

The Malvern returns as a new mid-price model featuring intuitive 1x10 speed transmission and larger volume 700 x 40c tyres. With hydraulic disc brakes, a comfort enhancing suspension fork and a full Shimano drivetrain it's built to give years of unrivalled performance.

Featuring an all-new lightweight custom butted frame with latest generation geometry, these bikes are the very definition of a contemporary Sports Hybrid - all the confidence and surefooted capability of our modern 29er hardtails, with the practicality of a trekking bike.

Puncture resistant tyres offer extra reliability and performance.

Featuring an all-new lightweight custom butted frame with latest generation geometry, these bikes are the very definition of a contemporary Sports Hybrid - all the confidence and surefooted capability of our modern 29er hardtails, with the practicality of a trekking bike.

Our mudguard-compatible frames are designed to accommodate modern high volume tyres, feature our proprietary BBX internal cable routing and are loaded with unique design touches and British weatherproof features - such as the forward facing seat slot that stops water spray from the rear wheel getting into the frame.

1x11 speed for sequential shifting simplicity provide reliable, lightweight transmission with all the gears you'll need. Hydraulic disc brakes, puncture resistant tyres and a comfort enhancing suspension fork complete the package and promise years of trouble free performance.

STEPS E-BIKES

Designed around Shimano's all-new, light-weight E5000 and E6100 Series e-Bike systems, all-day performance is further improved. Their latest generation motor and battery technology gives fully tuneable, instinctively interactive power assist with an effective exploring range of up to 150km from a full charge.

Whether you choose an all-terrain Coniston or the urbanised Clifton and Highgate models, our signature confident handling characteristics and powerful disc brakes on all bikes mean their easy speed is always under control on a twisty downhill, picture postcard towpath trail or cross city commute.

Reviews

"With a compact frame and Shimano STEPS system at its core, Whyte have brought together an expertly designed bike that can comfortably go for 77 miles on a single charge. Featuring integrated lights, powerful disc brakes and Road Plus tyres, the Highgate is a road bike built to cope with the trials and tribulations of the urban jungle" - Highgate - Red Bull

Using Shimano's STEPS e-Bike Drive Unit the Coniston is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling.

Our custom built e-Bike frames are loaded with unique design touches and British weatherproof features - such as the forward facing seat slot, continuous outer cables that keep the gear shifts working smoother for longer and optional custom matched mud guards.

The ride-feel of these e-Bikes is second to none, with a fantastic quality lightweight frame which includes our uniquely shaped rear seat stays for comfort and performance, plus Whyte's very own take on All Terrain geometry.

Using Shimano's STEPS e-Bike Drive Unit the Highgate is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling of this compact fit bike.

The Highgate comes fitted with 650b wheels and 47c RoadPlus, WTB Byway tyres, offering greater comfort, better grip and increased security on rough urban roads and light off-road rides.

Integrated lighting, controlled from your STEPS head unit gives you fingertip control of your lights for year-round usage. These powerful lights make night riding easy but also give you the ability to use them as daytime running lights for extra visibility

Using Shimano's STEPS e-Bike Drive Unit the Clifton is able to take advantage of the pedal assist without compromising the weight distribution and therefore the handling.

The Clifton comes fitted with 650b wheels and 47c RoadPlus, WTB Byway tyres, offering greater comfort, better grip and increased security on rough urban roads and light off-road rides.

Integrated lighting, controlled from your STEPS head unit gives you fingertip control of your lights for year-round usage. These powerful lights make night riding easy but also give you the ability to use them as daytime running lights for extra visibility

FAZUA EBIKES

ADVANCED EBIKING TECHNOLOGY

We've empowered our Fast Urban, Adventure and Gravel series bikes with Fazua Evation - the lightest and most compact drive system in its field.

The unique, slimline design weighs in at only 3.3 kg and combines motor, battery and electronics in one cylindrical Drivepack which neatly slots and clicks into the downtube.

A key benefit of the Fazua drive system is the surprisingly natural ride feel, greatly helped by the super-smooth clutch that disengages the motor from the bottom bracket whenever you ride faster than 25 km/h. The transition between assisted and self-propelled is almost imperceptible as the motor feathers out and the rider powers through without feeling any drag from the motor.

Double-sided rider input torque and cadence sensors within the BB unit mean that the up-to 60Nm of additional torque is applied smoothly and proportionately at exactly the right moment and with no perceptible lag. 3 power mode settings, of 125W through 250W to a maximum peak power of up to 400W adjust the amount of assistance on hand from a supportive tail wind in Breeze mode to full-on Rocket mode.

Allowing maximum flexibility all Fazua-powered Whyte bikes can be easily converted to conventional bikes in seconds – simply release the Drivepack and replace it with a specially developed, hollow aluminium cover which doubles as practical storage space.

The Hoxton takes our winning Fast Urban formula of MTB geometry, rugged reliability and road plus wheels and integrates the super-stealthy Fazua Evation system.

Stylish tan wall tyres give this city bike a real contemporary look and the high air volume comfort they add takes the sting out of even the roughest roads. It's never been easier to cut across town - enjoying a Whyte eBike tailwind all the way.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.

The Winchelsea combines our Glencoe Road Plus bike with the Fazua eBike system to create a super stylish road bike that will take you on road and path adventures with a little help when you need it.

1 x 11 gearing offers simplicity and efficiency that cannot be rivalled. Full Hydraulic brake will give you braking control and consistent modulation whatever the weather.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.

A truly ground-breaking Gravel/Adventure E-bike with MTB-inspired geometry, tubeless ready wheels and tyres, hydraulic disc brakes and SRAM's Rival 1 groupset, paired to the Fazua e-Bike motor with a 350Wh battery.

Using high air volume 650b x 47c tyres the Gosford makes light of both rough road surfaces and bridle path excursions. Whether heading out for a summer off-road ride or a mid-winter blast, the Gosford give the rider year-round, all-round power-assisted flexibility.

We've been careful not to compromise our geometry formula by fitting drive units or batteries and have designed our eBikes to feel and handle like our award winning mechanical bikes - with range extending, climb flattening Fazua assistance on hand when you need it most.
